

# Mark Scheme (Results)

June 2024

Pearson Edexcel International Advanced  
Level In Physics (WPH14) Paper 01  
Further Mechanics, Fields and Particles

Question Number	Answer	Mark
1	<p><b>A is the correct answer</b> because ampere is the only SI base unit given</p> <p>B is not correct because coulomb is not a base unit in SI</p> <p>C is not correct because joule is not a base unit in SI</p> <p>D is not correct because tesla is not a base unit in SI</p>	1
2	<p><b>D is the only correct answer</b> because it shows the correct vector diagram</p> <p>A is not correct because this shows <math>R - Q</math></p> <p>B is not correct because this shows the correct magnitude in the opposite direction</p> <p>C is not correct because this shows <math>Q - R</math></p>	1
3	<p><b>A is the only correct answer</b> because the force is down the page using FLHR</p> <p>B is not correct because it does not show the force down the page</p> <p>C is not correct because it does not show the force down the page</p> <p>D is not correct because it does not show the force down the page</p>	1
4	<p><b>C is the only correct answer</b> because using <math>F = BIl</math> gives <math>I = F / Bl</math></p> <p>A is not correct because it is not <math>I = F / Bl</math></p> <p>B is not correct because it is not <math>I = F / Bl</math></p> <p>D is not correct because it is not <math>I = F / Bl</math></p>	1
5	<p><b>A is the only correct answer</b> because the particles are accelerated by electric fields across the gap and magnetic fields in the dees</p> <p>B is not correct because the particles follow a semi-circular path of constant radius followed by a straight portion across the gap and then a semi-circular path of greater constant radius and so on</p> <p>C is not correct because the electric field changes direction when the particles are in the dees, not when the particles are in the gaps</p> <p>D is not correct because the magnetic field does not change direction</p>	1
6	<p><b>D is the only correct answer</b> because <math>t = \frac{-t}{\ln\left(\frac{V}{V_0}\right)}</math></p> <p>A is not correct because it is not <math>\frac{-t}{\ln\left(\frac{V}{V_0}\right)}</math></p> <p>B is not correct because it is not <math>\frac{-t}{\ln\left(\frac{V}{V_0}\right)}</math></p> <p>C is not correct because it is not <math>\frac{-t}{\ln\left(\frac{V}{V_0}\right)}</math></p>	1
7	<p><b>B is the only correct answer</b> because neutrons were not demonstrated to exist until Chadwick's experiments</p> <p>A is not correct because this is a valid conclusion</p> <p>C is not correct because this is a valid conclusion</p> <p>D is not correct because this is a valid conclusion</p>	1

8	<p><b>C is the only correct answer</b> because the area under a force-time graph is the change in momentum</p> <p>A is not correct because the area under a force-time graph is not acceleration  B is not correct because the area under a force-time graph is not force  D is not correct because the area under a force-time graph is not distance</p>	1
9	<p><b>A is the only correct answer</b> because the kinetic energy of the particle decreases by synchrotron radiation and, if not in a vacuum, ionisation and the path therefore decreases in radius because decreasing ke decreases momentum and <math>r = p/BQ</math></p> <p>B is not correct because this would increase the radius  C is not correct because this would increase the radius  D is not correct because this would increase the radius</p>	1
10	<p><b>B is the only correct answer</b> because <math>r = p/Bq = mv/Bq</math> and mass is 4 times mass of a proton and charge is twice the charge of a proton while <math>B</math> and <math>v</math> remain the same, so the multiplying factor is <math>4/2 = 2</math> and the initial radius is <math>2r</math></p> <p>A is not correct because the initial radius is <math>2r</math>  C is not correct because the initial radius is <math>2r</math>  D is not correct because the initial radius is <math>2r</math></p>	1

Question Number	Answer	Mark
11(a)	Top numbers: 4 (9) 12, 1	(1)
	Bottom numbers 2 (4) 6, 0	(1)
	Example of formula	
	${}^4_2\alpha + {}^9_4\text{Be} \rightarrow {}^{12}_6\text{C} + {}^1_0\text{n}$	
11(b)	Max 2 from	
	A neutron is not a <u>fundamental</u> particle	(1)
	(Because) it is made of <u>quarks</u>	(1)
	It is correct that a neutron is not made of an electron and a proton	(1)
	<b>Total for question 11</b>	<b>4</b>

Question Number	Answer	Mark
12(a)	Complete circuit with ammeter <b>and</b> cell / battery in series with the capacitor and the resistor (1)	1
12(b)(i)	Use of $I = I_0 / e$ to find time constant (1) <b>Or</b> Intercept with $t$ axis using initial tangent to find time constant (1) Use of time constant = $RC$ (1) $C = 0.018$ (F) (2 s.f.) (1) <b>OR</b> Attempts a pair of readings of $I$ and $t$ from graph (1) Use of $I = I_0 e^{-t/RC}$ <b>or</b> Use of $\ln I = \ln I_0 - \frac{t}{RC}$ (1) $C = 0.018$ (F) (2 s.f.) (1) <u>Example of calculation</u> $I = 2.4 \text{ mA} / e = 0.9 \text{ mA}$ Time constant = 90 s $C = 90 \text{ s} / 5100 \Omega = 0.0176 \text{ F}$	3
12(b)(ii)	Use of $V = IR$ for initial p.d. using initial current (1) Use of $C = Q / V$ (ecf from (b)(i)) (1) $Q = 0.22 \text{ C}$ (1) <u>Example of calculation</u> $V = 0.0024 \text{ A} \times 5100 \Omega = 12.2 \text{ V}$ $Q = 1.8 \times 10^{-2} \text{ F} \times 12.2 \text{ V} = 0.22 \text{ C}$	3
12(b)(iii)	Use of suitable equation, e.g. $W = \frac{1}{2} QV$ (ecf from (b)(i) and (b)(ii)) (1) $W = 1.3 \text{ J}$ (1) <u>Example of calculation</u> $W = \frac{1}{2} \times 0.22 \text{ C} \times 12.2 \text{ V}$ $W = 1.34 \text{ J}$	2
Total for question 12		9

Question Number	Answer	Mark
13(a)	<p>Use of trigonometry suitable to determine sine or cosine of angle of disk with horizontal or vertical (1)</p> <p>Use of <math>W = mg</math> (1)</p> <p>Use of component of <math>W</math> with correct function and angle, eg <math>F = W \sin \theta</math> (1)</p> <p><math>F = 0.018 \text{ (N)}</math> (1)</p> <p><b>OR</b></p> <p>Use of <math>E_{\text{grav}} = mgh</math> (1)</p> <p>State and justify use of conservation of energy (1)</p> <p>Use of work done = force <math>\times</math> distance (1)</p> <p><math>F = 0.018 \text{ (N)}</math> (1)</p> <p><u>Example of calculation</u>  <math>\sin \theta = 6.3 \text{ cm} / 30 \text{ cm} = 0.21</math>  <math>W = 0.0088 \text{ kg} \times 9.81 \text{ N kg}^{-1} = 0.086 \text{ N}</math>  <math>F = 0.086 \text{ N} \times 0.21 = 0.018 \text{ N}</math></p>	4
13(b)(i)	<p>Use of <math>\omega = 2\pi / T</math> (1)</p> <p>4.7 radian <math>\text{s}^{-1}</math> (1)</p> <p><u>Example of calculation</u>  <math>\omega = 2\pi / (60 \text{ s} / 45) = 4.71 \text{ radian s}^{-1}</math></p>	2
13(b)(ii)	<p>Use of <math>F = m\omega^2 r</math> (1)</p> <p>Subtracts <math>r</math> from radius (1)</p> <p>4.8 cm from edge with comparison and conclusion (ecf from (b)(i)) (1)</p> <p><b>OR</b></p> <p>Subtracts distance from edge from radius (1)</p> <p>Use of <math>F = m\omega^2 r</math> <b>Or</b> Use of <math>F = mv^2/r</math> <b>and</b> <math>v = r\omega</math> (1)</p> <p><math>F = 0.019 \text{ N}</math> with comparison and conclusion (ecf from (b)(i)) (1)</p> <p><u>Example of calculation</u>  <math>0.02 \text{ N} = 0.0088 \text{ kg} \times (4.71 \text{ radian s}^{-1})^2 \times r</math>  <math>r = 0.102 \text{ m}</math>  <math>0.15 \text{ m} - 0.102 \text{ m} = 4.8 \text{ cm}</math> which is just less than 5 cm</p>	3
